Simulated Pyrotechnic Effects: Cold Spark Technology (Indoor/Outdoor)

Permit No: _____ Date Issued: _____

Applicant Name: _____ Location of Display: _____

Contact Name (if different): _____ Date of Display: _____ Time of Display: _____

Address: _____ Operator(s) Name: _____

Phone: _____

Email: _____ Bensalem License No: _____

***Cold Sparks devices are not to be used in temporary membrane structures. (eg. tent or canopy)**

Applicant shall:

- Provide an overall site plan indicating the locations of spectators, location of devices, required clearances, list of fire protection/alarm systems present.
- Documentation of authorization for use from the venue.
- Spark height minimum 3 ft clearance from the ceiling, and total maximum height of 8ft high.
- Provide a list of each Simulated Pyrotechnic Effects device.
- Provide the full manual for each device being utilized, materials being used (must specify indoor or outdoor usage), and total quantity that will be on-site (attach additional sheet if necessary).
- Certificate of Insurance is also required.
- Provide a copy of your Bensalem Fire Rescue Department Contractor License

As a condition of the permit, the Fire Inspector (FI) must inspect the site, effects, equipment, installation and display prior to the start of the display. Fire Inspector must remain on site if any fire safety system is by-passed or placed on test (alarm, sprinklers, etc.). After hours Fire Inspector's overtime cost will be added to the permit. Two pressurized water and two 10-BC, Class D, or manufacturer recommended extinguishers are required on location.

All simulated pyrotechnic effects/display activity shall be performed in compliance with International Fire Code 2021 Chapter 56, NFPA 1123 and NFPA 1126

Applicant agrees to supply all required documents and to comply with Bensalem Fire Rescue requirements.
